- Completed training in ethical hacking, cybersecurity fundamentals, threat awareness, and practical countermeasure concepts.

Bosworth College | Completed

Senior Secondary Certificate Examination (SSCE)

Murtala Muhammed Airport Secondary School | Completed

Junior Secondary Certificate Examination (JSCE)

EXPERIENCE

Backend & Automation Development | Current focus

Current tools - Python / Flask / FastAPI / MySQL

- Build backend features, validation flows, API-driven products.
- Design automation-oriented solutions that reduce manual work and improve workflow reliability.
- Approach implementation with a strong focus on readable structure, maintainability, and useful outcomes.

Telegram & Discord Bot Systems | Ongoing

Ongoing - python-telegram-bot / discord.py

- Create bot-powered interactions that connect users to commands, notifications, and workflow actions.
- Approach implementation so services are more responsive and easier to operate.
